

## PROJET A KYOTO :

Le projet est une galerie d'art, sur deux niveaux,

A partir des résultats d'images de Deep-Art, mon modèle grasshoper se constitue de Box et Cylindres,

Le projet se situe au niveau du Delta avec le passage de deux rivières de part et d'autre,

implanté en milieu boisé, il reprend par les parallélépipèdes allongés et les cylindre en hauteur, la métaphore de l'arbre afin d'être en harmonie avec son environnement immédia
