# Process of thinking

1.Super Block.

2.Make path.
Separate volume.

Path

New Volumes
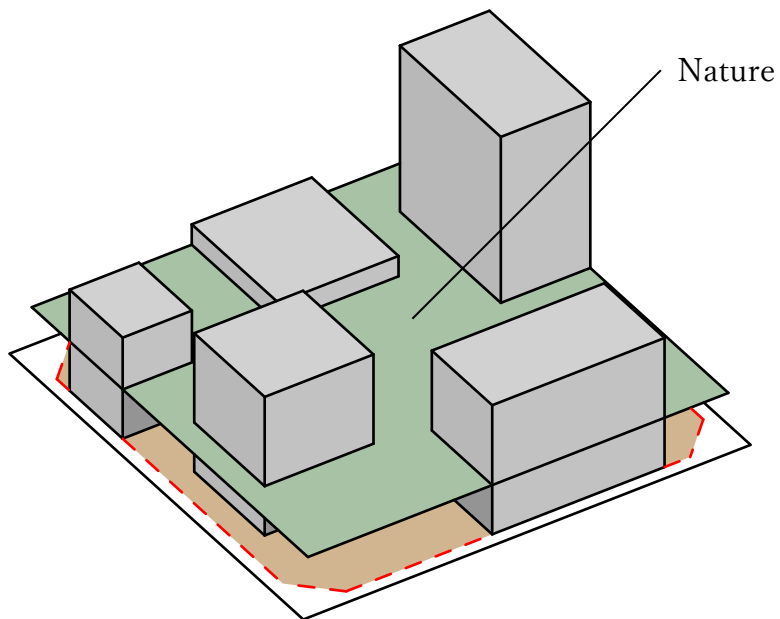

3.Cover the nature above ground.
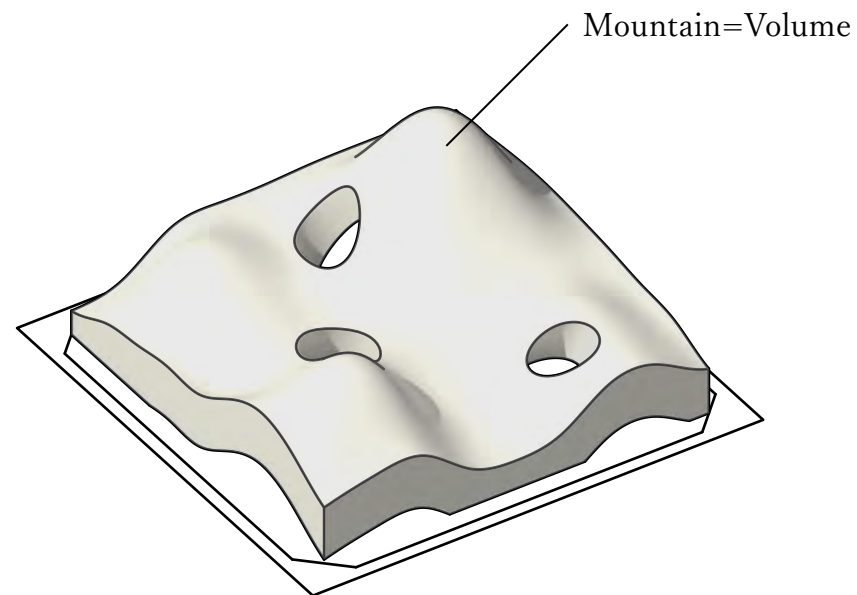

Nature

4.Combine two elements into one block type
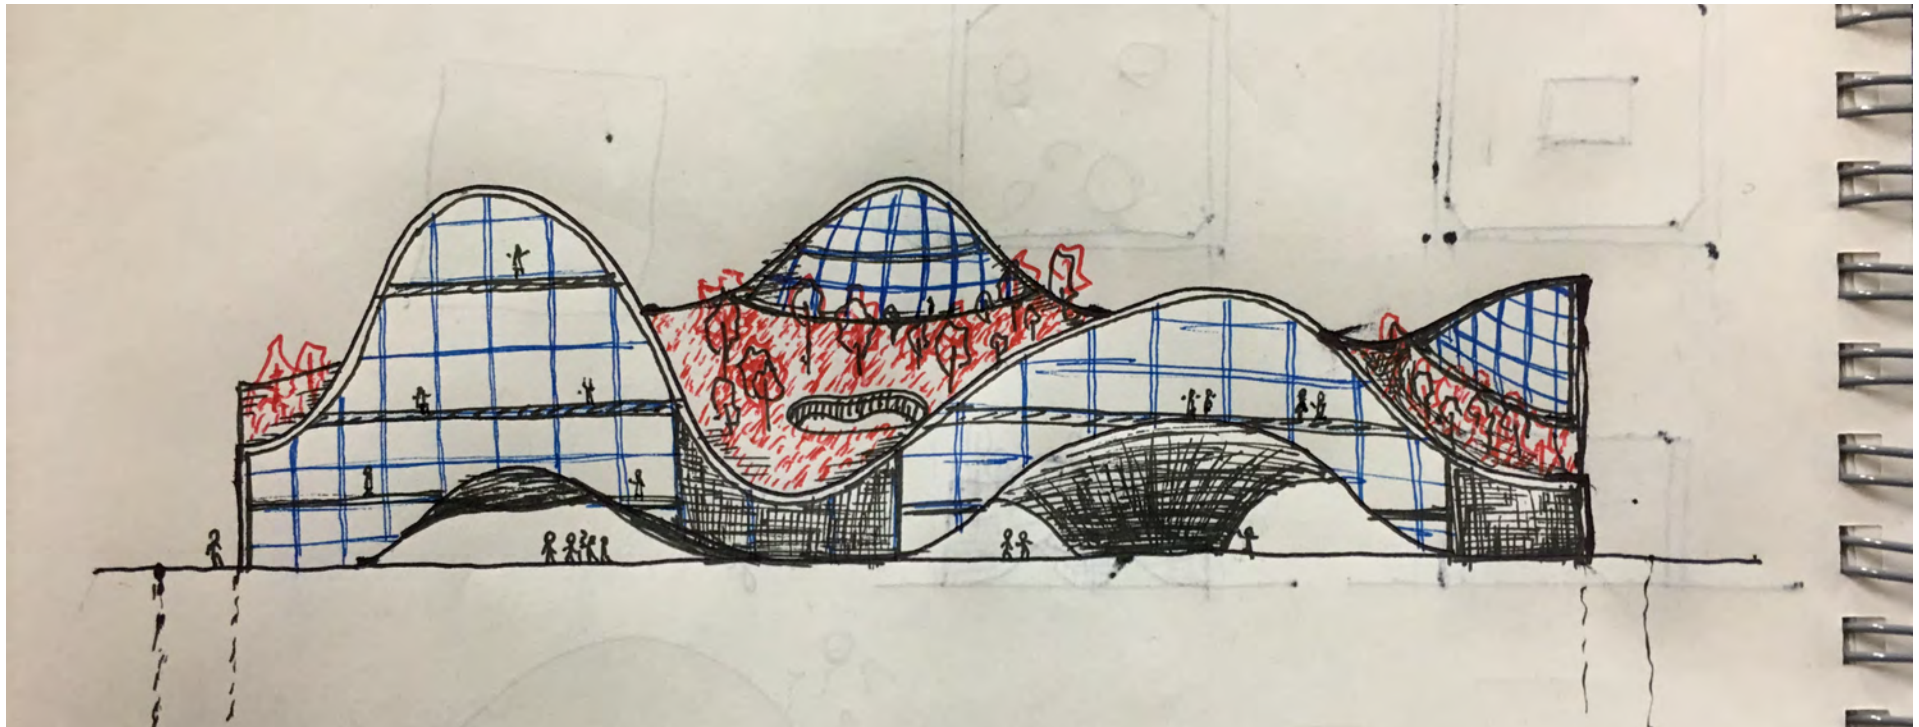

Mountain=Volume

Separated Volumes was changed into the mountain-like shapes, and roof top which was curved with connecting each mountain would be the nature park.
From the up floor of the mountain people can access the Roof-Top-Nature directly.
On the ground level people can walk through under the new block.
